Togaf 9.2 study guide pdf download

Continue

TOGAF is a longstanding, popular, open-source enterprise architecture framework that is widely used by large businesses, government agencies, non-government public organizations, and defense agencies. Offered by The Open Group, TOGAF advises enterprises on how best to implement, deploy, manage, and maintain enterprise architecture. The Open Group offers several options for those who want to be certified in the TOGAF 9. Earning a cert is a great way to demonstrate to employers that you are qualified to work in an enterprise architecture environment using the TOGAF 9.2 Standard framework. TOGAF is designed to help organizations implement enterprise architecture management using a standardized framework that is still highly customizable to a company's specific enterprise architecture needs. Earlier this year, The Open Group announced the latest update to the TOGAF framework, releasing TOGAF Standard, 10th Edition. The update brought changes to the structure of the framework, making it easier to navigate and more accessible for companies to adopt and customize for their unique business needs. Currently, The Open Group offers certifications only for TOGAF 9, but there are plans to release new certifications that align with TOGAF Standard, 10th Edition. This article will be updated once the new certifications are announced in the coming months. TOGAF 9 Foundation and TOGAF 9 Certified The TOGAF 9 Foundation and TOGAF 9 Certified are the two main certifications for the TOGAF Standard, Version 9.2 offered by The Open Group. To earn your TOGAF 9 Foundation certification, you'll need to pass the TOGAF 9 Part 1 exam. To earn the next level of certification, the TOGAF 9 Certified designation, you'll need to pass the TOGAF 9 Part 2 exam. You can opt to take each exam separately at different times, or you can take the TOGAF 9 Combined Part 1 and Part 2 exam to earn both certifications at once. There are no prerequisites for the TOGAF 9 Part 1 exam, but you will need to pass the first exam to qualify for the TOGAF 9 Part 2 examination. The TOGAF 9 Part 1 exam covers basic and core concepts of TOGAF, introduction to the Architecture Development Method (ADM), enterprise continuum and tools, ADM phases, ADM guidelines and templates, architecture governance, architecture viewpoints and stakeholders, building blocks of enterprise architecture, ADM deliverables, and TOGAF reference models. The TOGAF 9 Part 2 exam has eight scenario-based questions that demonstrate your ability to apply your foundational knowledge from the first exam to real-world enterprise architecture situations. The eight questions are drawn from topics such as ADM phases, adapting the ADM, architecture content framework, TOGAF reference models, and the architecture capability framework. TOGAF Business Architecture Level 1 The Open Group offers the TOGAF Business Architecture Level 1 certification, which focuses on validating your knowledge and understanding of business modeling, business capabilities, TOGAF business scenarios, information mapping, and value streams. Integrating Risk and Security Certification The Open Group also offers the Integrating Risk and Security Certification, which validates that you understand several security and risk concepts as they apply to enterprise architecture. The certification covers important security and risk concepts as they relate to the TOGAF ADM, information security management, enterprise risk management, other IT security and risk standards, enterprise security architecture, and the importance of security and risk management in an organization. There are no prerequisites for the exam, but to pass you will need to attend three hours of training from an accredited training course and then pass the assessment. There is an option for self-study training via an e-learning platform. TOGAF certification training The Open Group offers self-study material, with two available study guides that cover the TOGAF 9 Foundation and learning outcomes that go beyond the foundational level. Those who wish to attend prep courses can search through accredited courses. Some courses also include the examination at the end of the course, depending on the program. TOGAF certification cost For the English TOGAF exams the current rate is US$360 for Part 1, US$360 for Part 2, or US$550 for the Combined Part 1 and Part 2 exam. The English TOGAF Business Architecture Level 1 exam is priced at US$315. There is currently no pricing information available for the Integrating Risk and Security Certification. It's also important to note that pricing and rates per exam will change depending on where you're located. To see the rates for other countries and languages, check The Open Group's website for more information. TOGAF Role-Based Badges The Open Group also offers TOGAF Role-Based Badges designed for IT professionals seeking to demonstrate enterprise architecture knowledge and skills. The Badges are digital and verified by "secure metadata" as a way for you to display achievements and awards online, and for organizations to easily verify certifications of potential candidates. They can also be used to identify various milestones as you work your way toward a full certification. Badges can be used in email signatures, on your personal website or resume, and on your social media accounts. The Open Group offers three categories of Role-Based Badges for TOGAF 9.2: Enterprise Architecture, Enterprise Architecture Modeling, and Digital Enterprise Architecture. Under each category, there are two types of badges you can earn, Team Member or Practitioner. You'll earn different badges depending on which certifications you complete or how far along you are in completing the TOGAF 9.2 Certified credential. Learning Books Summary Here on this page, we have provided the latest download link for TOGAF 9 Certified Study Guide PDF. Please feel free to download it on your computer/mobile. For further reference, you can go to opengroup.org Why you should buy from amazon? It is always better to buy books in order to support the authors and publishers. As the hard-working writer diligence should be paid off. Know more about our initiative Help us to serve you better. Rate this PDF [Total: 1 | Average: 5] If you find this PDF violating your rights, and you want to unpublish it, Please Contact-Us / DMCA. To get TOGAF 9 certified, you must pass The Open Group's TOGAF Certification exams. Both exams test your knowledge of TOGAF. The first exam, TOGAF 9 Foundation, is a broad knowledge test about the TOGAF standard. The second exam, TOGAF 9 Certified, tests your ability to apply the TOGAF standard in different enterprise architecture scenarios. Everything is about knowing the TOGAF standard, and passing the exam. There are two real options for TOGAF Certification preparation: Self Study or Accredited TOGAF Training. The TOGAF Standard evolves as the established state-of-the-art enterprise architecture improves. Every release builds on a solid base of established best practice. The best ideas transition from novel experimental concepts to established method to industry best practice. Some ideas need to be pruned at the experimental stage. The TOGAF 9 People Certification program was designed to accommodate updates to the TOGAF 9 standard. The certification levels remain as TOGAF 9 Foundation and TOGAF 9 Certified. Individuals who have been certified in the TOGAF 9 People Certification program remain certified. Within 12 months of the release of a new version, all certification is based on the current version. Since version 9.2 was released in 2018, today all examinations are based on version 9.2. Do not read the TOGAF Standard. While 9.2 is an easier read than 9, or 9.1, it is long and not structured to help you pass the TOGAF certification exam. Reading the TOGAF Standard is like reading the Bluetooth specifications to learn how to pair a bluetooth headset. For the true Do-it-Yourself type, go to The Open Group website and purchase the TOGAF Study Guide Bundle. The Study Guide bundle includes the official sample exams and the study guide. Start with a sample exam as a diagnostic. Do not study the parts of the exam you are passing. You know those parts. Find the parts of the TOGAF standard you are not passing in the study guide. Look at the Learning Objectives to see what they will ask you. Learn the material appropriate for the exam. They organize the TOGAF 9 Foundation and TOGAF 9 Certified study guides around the certification learning outcomes. The study guide is built around the learning outcome, referenced text, and self-assessment questions. The Open Group TOGAF® 9 Certification Self-Study Pack, 4th Edition Bundle for self-study for TOGAF 9 Part 1 and Part 2 exams. TOGAF 9 Foundation Study Guide, 4th Edition (PDF) – B180 TOGAF 9 Certified Study Guide, 4th Edition (PDF) – B181 TOGAF 9 Part 1 Practice Test (PDF) – B092 TOGAF 9 Part 2 Practice Test (PDF) – B093 Contains bonus material: The TOGAF Standard Reference Cards (PDF) – N180 The TOGAF Standard ADM Reference Cards – N181 The TOGAF Standard Pocket Guide (PDF) – G185 TOGAF 9 Certification Program (PDF) White Paper: An Introduction to the TOGAF Standard, Version 9.2 The Open Group accredits training providers and training courses. Accredited training is prepares you for the certification examinations. The accreditation confirms the course includes all learning outcomes. Learning objectives are specified in the TOGAF Certification Policy. The intent of The Open Group accreditation process is to assure you that the training can prepare you for the certification exams. Selecting your Training Provider Frankly, any accredited training provider can teach you the material to pass the TOGAF 9 Certification Exams. The exams assess whether you know the learning outcomes. The Open Group maintains a list of all accredited e-learning TOGAF training. We think you should select your training provider based on three criteria. Your TOGAF Training Objectives Expand Do you want to pass the exam with minimum fuss, or learn to be a better enterprise architect? Or some balance between the two? We assume you want the same things we do when developing our consultants and clients. We use the TOGAF Standard to deliver transformative enterprise architecture. We make a difference. So, we designed our course to deliver meaningful skill improvement. Our instruction is heavily weighted to using the TOGAF standard. Your Learning Style Expand Do you learn by reading, listening, or doing? We designed our course to hit all three. We use online video-based training to talk you through the lessons. Our slides and the surrounding web pages are text heavy for the readers. Our exercises let you try the essential scaffolding out and build an enterprise architecture using the TOGAF framework. Your Time Criteria Expand Can you sit-down and learn all day for a few days, or do you need to break your learning-up? We put you in control of our course. The training is available when you decide the class starts. The class continues until you are done. 20 minutes or 20 hours - you decide. We use our training when we are developing an enterprise architecture team. In these projects we are always in a hurry. We need to get some useful enterprise architecture while we improve the team. We always use online training: Students can proceed at their pace Some students commit full days, while others spread their learning out. Speed the education process All of us enter the course with prior knowledge. Online training lets you skip ahead or repeat until you are comfortable. Training at their convenience. It is never convenient to take the entire team off to a course.
